EDUCATION

University of Maryland, College Park **December 2024**
Bachelor of Science in **Computer Science,** Minor in **Math**
Relevant Coursework: Databases & Database Design, JavaScript Web Development, Advanced Data Structures, Data Structures & Algorithms, Introduction to Computer Systems, Object-Oriented Programming, Computer Networks & Security, Discrete Structures, Linear Algebra, Linux

SKILLS

Proficient Languages: TypeScript, JavaScript, Python, HTML, CSS, SCSS,
Frameworks & Databases: Next.js, React.js, Ember.js, Express.js, PostgreSQL, SQL, GraphQL
Tools: Jira, Bitbucket, Chrome dev. tools, Vite, Git, GitHub, Docker**,** Visual Studio Code, Heroku, Vercel, QUnit

EXPERIENCE

Reingold | Next.js, React.js, TypeScript, SCSS, AEM, GraphQL, Tailwind, CSS **Alexandria, Virginia**
Frontend Developer **June 2025 - Present**

- Developing two scalable web applications for WMATA, improving accessibility and usability for thousands of daily riders
- Resolving UI and accessibility issues for WMATA, ensuring WCAG compliance, and bug-free functionality
- Developed responsive frontend components for an NBA website redesign, leveraging React.js, GraphQL, Tailwind, and WordPress CMS

LinkedIn | Ember.js, TypeScript, GraphQL, Qunit **Sunnyvale, California**
UI Engineer Intern **May. 2023 - Aug. 2023**

- Engineered an onboarding widget, boosting visibility for LinkedIn's Get Hired newsletter (1.2M+ subs.)
- Refined web accessibility in LinkedIn's onboarding by adding ARIA roles to Ember components, enhancing navigation for screen reader users.
- Wrote tests in Ember.js's testing framework QUnit with 90% code coverage

Course Hero | React.js, Express.js, Node.js, PostgreSQL, ChakraUI **Remote**
Full Stack Engineer Intern **Jun. 2022 - Aug.2022**

- Worked with two other interns to develop MotivateMe, an application aimed at empowering university students in workload management, motivation, and productivity
- Investigated and resolved UI defects by leveraging browser DevTools and React DevTools, enhancing debugging efficiency and reducing defect turnaround time.
- Developed and integrated RESTful APIs in Express and PostgreSQL, enabling secure user authentication and efficient data persistence

PROJECTS

Flixster | ReactJS, TypeScript, Styled-Components, Material UI

- Displays the latest and most popular movies in the U.S on a responsive user interface
- Retrieved data from The Movie Database API using asynchronous JavaScript and HTTP GET requests
- Features infinite scroll, search capabilities with live results, and optimized performance, including debouncing techniques for high-speed performance and convenience
- Utilized CSS media queries and Flexbox to ensure compatibility with a variety of screen sizes

Airline Flight Database | SQL, PostgreSQL

- Engineered and optimized 12 advanced SQL queries across a 4-table relational flight database, demonstrating proficiency in joins, subqueries, CTEs, and aggregations
- Designed ranking and analytics queries to identify frequent fliers, airline loyalty to hubs, and customer flight patterns, improving the ability to extract actionable insights from complex datasets

LEADERSHIP

Hack4Impact, *Tech Lead* **Sept. 2022 - Dec. 2022**

- Led a team of 4 engineers in the development and enhancement of CORA's and Hack4Impact's websites; improved load times by 30% by rewriting backend STRAPI queries
- Created onboarding materials and mentored peers, ensuring high-quality code and faster team ramp-up
